

COMMUNITY LEADERSHIP ACADEMY

Introduction

One of our members has shared their experience as a participant of Community Leadership Academy. They are the Founding Director of a London-based organisation working with Parents, Children and Young People of African Descent, creating learning opportunities for them.

What challenges did you face that led you to seek out Community Leadership Academy?

As the Founder of a newly registered Community Interest Company, I wanted to ensure that I was in a space with other Community Group Leaders to gain and share relevant information and knowledge on the range of topics that could enhance the way in which I work within my organisation and with my volunteers.

What are you enjoying about CLA?

I am enjoying the quality of the experts that we have been exposed to, the opportunity to hear the experiences of other Community Group Leaders and finding out the wide range of services available from other organisations. I appreciate having the small group seminars that allow for specific and personalised conversations that we may not have the time to explore within the main workshop space.

How has the programme helped you with the challenges you were facing?

The programme has enabled me to hear about local funding opportunities, network with organisations that share similar aims and objectives, and hear their experiences of being either new or mature organisations.
